

## Kongres Container

# 100MW 200MWh energy storage power station project

 **TAX FREE**    

## ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

The diagram shows a vertical Energy Storage System (ESS) unit. It has a grey front panel with a central door handle and a lock mechanism. Two vertical green lines run down the center of the panel. The letters 'ESS' are printed in green in the upper right corner. At the bottom of the panel, there are two yellow triangular warning symbols with a lightning bolt inside, indicating high voltage or electrical hazard.

## Overview

---

The project plans to build a large-scale energy storage power station with a design capacity of 100MW/200MWh, aiming to achieve efficient and stable energy storage and release by deploying 20 sets of advanced 5MW/10MWh liquid-cooled energy storage units. What is the 100 MW energy storage system?

The 100 MW system is an energy storage installation that will provide critical capacity to meet local reliability needs in the area, while helping California meet its environmental goals.

What is Datang Hubei sodium ion new energy storage power station?

The project represents the first phase of the Datang Hubei Sodium Ion New Energy Storage Power Station, which consists of 42 battery energy storage containers and 21 sets of boost converters. It uses 185 ampere-hour large-capacity sodium-ion batteries supplied by China's HiNa Battery Technology and is equipped with a 110 kV transformer station.

Where is Datang Group's 100 mw/200 MWh sodium-ion energy storage project located?

The first phase of Datang Group's 100 MW/200 MWh sodium-ion energy storage project in Qianjiang, Hubei Province, was connected to the grid. From pv magazine ESS News site.

How does the energy storage system work?

Each energy storage unit is connected to the 35kV distribution unit of the booster station through a 35kV collector line and then boosted to 220kV via a 120MVA (220/35kV) transformer. The project is equipped with an energy management system (EMS) to receive grid dispatching commands and manage the charge and discharge of the energy storage system.

Why should you choose Tai'erzhuang ESS power station?

With strong load-changes tracking, fast and precise PQ response, and a bidirectional regulation function, Tai'erzhuang ESS power station is a quality and flexible power source to participate in peak & frequency regulation and emergency backup, thus ensuring the safety and stable operation of the power grid.

How much power does Zaozhuang have?

Take Zaozhuang city as an example, the total installed capacity of wind and solar power generation has reached 2,536,600 kilowatts, accounting for 31.9% of the city's total capacity, which makes the peak and frequency regulation more difficult. the regulation ability of the power grid.
