

Kongres Container

12V inverter reverse connection

Higer conversion efficiency

CAN/RS485/WIFI/4G
Blue tooth communication

20 Kwh

30 Kwh

50 Kwh

Thick shell, well protection for inside cells

BMS customization supported

Overview

When connecting the AC inverter to the battery terminals, it is important to connect the "+" wire to the "+" terminal and the wire to the "-" wire to the "-" terminal. Do NOT reverse the polarity. It will void the warranty. Make sure you connect negative to negative and positive to positive. Red (+)

12V inverter reverse connection
