50 000-kilowatt wind-solar-energy-storage power station

Overview

The project began construction in July 2017 and was fully connected to the grid in September 2019, with a total installed capacity of 700,000 megawatts, of which 200,000 megawatts of photovoltaic projects, 400,000 megawatts of wind power projects, 50,000 kilowatts of solar thermal power projects and 50,000 kilowatts of energy storage projects, making it the world's first multi-energy complementary project integrating wind solar and heat storage.
