# Alkaline energy storage battery

## Overview

---

Compared with zinc-carbon batteries, alkaline batteries have a higher energy density and longer shelf life yet provide the same voltage. Overview An alkaline battery is a type of where the (most commonly ) has a value above 7. Typically, these batteries derive energy from the reaction between.

Batteries with alkaline (rather than acid) electrolyte were first developed by in 1899, and, working independently, in 1901. The modern alkaline dry battery, using the zinc/
