# Annual production of 2GW high-efficiency solar module project

## Overview

---

This second phase aims to produce 2GW of solar modules per year with a total investment of 400 million yuan (approximately US\$56 million). Once completed in October 2024, it will generate an annual output of 2 billion (approximately US\$280 million).

This second phase aims to produce 2GW of solar modules per year with a total investment of 400 million yuan (approximately US\$56 million). Once completed in October 2024, it will generate an annual output of 2 billion (approximately US\$280 million).

It is now fully operational, specializing in the production of the latest high-efficiency N-type solar modules, with an annual production capacity of 2GW. There are plans to expand the capacity to 5GW by 2030. The production line is compatible with 182mm and 210mm N-type cells and is equipped with.

SEG Solar (SEG), a photovoltaic manufacturer, held a grand opening ceremony for its new PV manufacturing base in Houston, Texas, with the first 585W YUKON N series module rolling off the production line. With a total investment of approximately \$60 million and covering nearly 250,000 square feet.

Recently, Japanese cell and module manufacturer Toyo Solar announced plans to build a 2GW module manufacturing plant in the United States, expected to begin production next year. Toyo Solar, a subsidiary of Vsun Solar, will focus on producing TOPCon modules. This plan was disclosed in the company's.

PVTIME - Recently, the second phase of a solar module manufacturing project was launched in the Xinjiang region of China. This second phase aims to produce 2GW of solar modules per year with a total investment of 400 million yuan (approximately US\$56 million). Once completed in October 2024, it.

The event established SEG as one of the first manufacturers to achieve module production in the US. The facility produces the latest high-efficiency N-type solar modules, with an annual capacity of 2GW. Credit: ES\_SO/Shutterstock.com. SEG solar, a US photovoltaic (PV) manufacturer, has celebrated.

US solar module manufacturer SEG Solar has launched commercial operations at its PV manufacturing facility in Houston, Texas, which boasts an annual production capacity of 2GW. With the addition of the new facility, SEG Solar now aims to expand its global annual manufacturing capacity to 5.5GW by.
