# Approximate price of Russian inverter

## Overview

---

What is the market of inverters for electric vehicles in Russia?

Market of Inverters for Electric Vehicles in Russia competencies in advanced technical and technological approaches, working out technical solutions and obtaining a product with known characteristics at specific prices. Then, it is necessary to monetize this approach and hone the competencies in the development and production of our own chips.

How are inverters decomposed in Russia?

Inverters are decomposed in minute detail, specifically in terms of the critical technologies and an electronic component base that need to be developed in Russia. Creation of advanced modules for inverters in Russia is exemplified with an ongoing project of developing and establishing a production of specialized IGBT modules in MIDABody.

What is a local inverter market?

The main areas of application are analysed and the local inverter market is investigated, specifically in electric transport, solar and wind power generation, distributed smart power systems, including energy storage systems.

Is there a need for a converter in Russia?

In Russia, a number of companies also create electric vehicles, electric buses and infrastructure for their charging, but, unfortunately, imported converter equipment is used everywhere and there is no tendency to form teams for research and development of domestic technical solutions.

Does Russia have a solar power industry?

It should be noted that solar power engineering has begun to develop actively in the Russian Federation, but mainly imported converter equipment is used there. The global wind power industry has basically formed, and there are no

major transformations in it.

Who are the consumers of converter equipment & inverters?

Such consumers are developers and manufacturers of converter equipment, inverters, which in Russia and in the world face sales problems and fierce competition with global electrical enterprises and corporations, a weak marketing level and a low technical level of their products.
