Argentina outdoor energy storage power supply price

Overview

As of Q2 2024, residential storage systems in Argentina average \$450–\$700 per kWh, while commercial solutions range from \$380–\$550 per kWh. Here's a snapshot: Is solar power a viable option in Argentina?

Argentina has abundant solar resources, particularly in the northwest region, making solar power a viable option for electricity generation. Utility-scale solar projects and distributed solar installations are gaining momentum, contributing to the country's renewable energy goals.

Does Argentina need a hydro power plant?

Argentina has a long history of hydroelectric power generation, utilizing its rivers and water resources. Small hydro projects and potential expansion of existing hydro facilities present opportunities for further renewable energy development.

Where can solar power projects be implemented in Buenos Aires?

Solar power projects, including utility-scale solar plants and distributed solar installations, have been successfully implemented in this region. Buenos Aires Province: The Buenos Aires Province, as the most populated region in Argentina, offers significant opportunities for renewable energy development.

What is the potential for green hydrogen production in Argentina?

Green Hydrogen Potential: Argentina's potential for green hydrogen production using renewable energy sources presents significant opportunities for the market. Green hydrogen can be utilized for various sectors, including transportation and industry, fostering a sustainable energy ecosystem.

Conclusion.

Is Argentina a good place for solar power?

Abundant Solar and Wind Resources: Argentina possesses vast solar and wind potential, particularly in regions such as Patagonia and the northwest. The

country's favorable climate conditions and geographical characteristics make it an ideal location for solar and wind power generation.

Who is the largest gas producer in Argentina?

YPF was the largest gas producer in 2024 (12.3 bcm, 26%), followed by TotalEnergies (11.24 bcm, 24%), Tecpetrol (6.8 bcm, 15%), and Pan America Energy (6.8 bcm, 15%). In 2014, Apache Energy sold its gas operation to YPF for a total of US\$852m (reserves estimated at 15 bcm). Argentina is relatively well off in terms of energy resources.
