# Asian energy storage mobile power export enterprise

## Overview

---

Why does Southeast Asia need flexible energy storage solutions?

Southeast Asia's exponential growth in electricity demand, averaging over 6% annually over the past two decades, has created an urgent need for reliable and flexible energy storage solutions. This surge in demand is primarily driven by increasing ownership of household appliances and rising consumption of goods and services across the region.

Where can energy storage be used for capacity services?

Markets are increasingly seeking energy storage for capacity services (including through capacity markets). Japan, Poland, the UK, Chile, the US Southwest, New York and Australia are new markets opening up these opportunities.

Why did Energy Storage Summit Asia move from Singapore to Manila?

Returning for its third edition in 2025, the Energy Storage Summit Asia relocated from Singapore to Manila, in the Philippines. This shift reflects the country's emergence as a leader in energy storage deployment following the inaugural Green Energy Auction 4- the first auction to integrate Renewable Energy and Energy Storage Systems (IRESS).

Is Indonesia facilitating large-scale energy storage projects?

Indonesia's successful securing of a World Bank loan for developing pumped storage facilities exemplifies how government backing is facilitating large-scale energy storage projects.

Should Philippine energy storage systems be regulated?

The Philippines needs to establish clearly defined rules for the market participation of energy storage systems (ESS), the chair of the country's regulator has said. A renewable energy subsidiary of oil & gas company Reservoir Link has agreed to jointly develop the first dispatchable solar PV

power plant in Malaysia.
