Assembling a 5000W solar all-in-one machine

Overview

Can a solar charge inverter be disassembled?

Non-safety voltage exists inside the all-in-one solar charge inverter. To avoid personal injury, users shall not disassemble the all-in-one solar charge inverter themselves. Contact our professional maintenance personnel if there is a need for repair. Do not place the all-in-one solar charge inverter within the reach of children.

How does a solar power system work?

A complete system includes the following parts: Photovoltaic module: convert the light energy into direct current energy and then charge the battery via the all-in-one machine, or directly invert the light energy into alternating current to supply power to the load.

Is the all-in-one solar charge inverter off-grid?

The all-in-one solar charge inverter is off-grid. It is necessary to confirm that it is the only input device for load, and it is forbidden to use it in parallel with other input AC power to avoid damage.

How can solar energy be used for power generation?

Make full use of solar energy for power generation in the daytime and transfer to the mains supply for charge to maintain electric quantity of the battery. It is suitable for areas with relatively stable power grid and relatively expensive electricity price.

How many charge modes are there in a solar power system?

There are four charge modes namely only solar power, mains power priority, solar power priority, mains power & solar power; and two optional output modes, namely inverting and mains power to meet different application needs.

Do I need to repair a solar charge inverter?

Contact our professional maintenance personnel if there is a need for repair. Do not place the all-in-one solar charge inverter within the reach of children. Do not install the all-in-one solar charge inverter in harsh environments such as moist, oily, flammable or explosive, or heavily dusty areas.
