Base station solar panels and solar batteries

Overview

How do solar panels & battery storage work?

Solar panels help you generate power. Battery storage helps you keep that power for use when the sun isn't shining. The combo?

A 24/7 personal energy ecosystem. Let's start at square one. How do solar panels work?

They absorb sunlight and turn it into electricity (called DC power). An inverter then converts it into AC power for your home.

Should you use solar panels with a battery storage system?

Imagine waking up to a bright morning. Your coffee maker runs on the power from the sun you stored yesterday. There's no grid. No bills. No interruptions. It's just you and clean, uninterrupted power. That's the beauty of pairing solar panels with a battery storage system. It brings you closer to true 24/7 energy independence.

Why do solar panels need a battery?

A battery stores the extra electricity your solar panels generate during the day so you can use it: It's like having a power bank for your house. Key parts of a battery system: Together with your solar setup, this system makes sure your lights stay on even when the sun is gone or the grid is down. Solar panels are like the farmer.

How do I Pair my solar panels with a battery storage system?

Here's how to pair your solar panels with a battery storage system, step by step. Look at your utility bills. Figure out your average daily usage (in kWh). Consider any future appliances, EVs, or lifestyle changes. You want to produce more than you use. If your home uses 30 kWh/day, aim for 35-40 kWh/day from solar.

Can I add battery backup to my solar system?

The federal Inflation Reduction Act of 2022 also contains incentives that may affect your decision to add battery backup to an existing solar system: Through 2032, you'll be able to claim 30% of the project cost as a tax credit when you file with the IRS.
