Can a small business use a battery storage system?

Check out the battery storage guide for small businesses. Commercial battery storage systems can either be used on-grid or off-grid. On-grid applications offer functions such as peak demand charge reduction, renewable energy sources integration, and power backup during outages.

Are commercial and industrial energy storage systems the future?

Among the most promising advancements is the deployment of commercial and industrial energy storage systems that not only enables a more resilient and flexible energy infrastructure but also enhances cost savings, energy independence, and sustainability outcomes for businesses and the grid.

Where is Argentina's first lithium battery plant located?

In 2023, Y-TEC, an offshoot of the majority state-owned oil and gas company, Yacimientos Petrolíferos Fiscales (YPF), and the national research council, CONICET, inaugurated Argentina's first lithium battery plant in La Plata (Heredia, 2023).

Is US-China rivalry destabilizing Global battery production networks?

Within the existing geopolitical context, it also faces the dilemma of

navigating the tides of US-China rivalry that are currently destabilizing global battery production networks (Bridge and Faigen, 2022; Johnson and Khosravani, 2024; Torjesen, 2024).

Does Argentina have a good policy on lithium production?

Unlike Chile, Argentina's national government has done little to implement policies that would strengthen domestic production linkages (Obaya et al., 2021). Instead, the current policy allows international firms to pay lower taxes and royalties, enabling them to secure reliable supplies of semi- and unprocessed lithium with greater ease.
