# Bolivia s new outdoor power market

## Overview

---

Blackridge Research's Bolivia Wind Power Market Outlook report provides comprehensive market analysis on the historical development and targets, the current state of wind power installation scenario, and its outlook. How many electricity projects are there in Bolivia?

Bolivia currently has over a dozen electricity generation projects (hydroelectric, solar, combined cycle, and geothermic) and transmission line projects in progress and over 30 projects under study, including the construction of two biomass power plants. Bolivia plans to invest billions towards expanding its electric grid through 2025.

Will Bolivia expand its electric grid through 2025?

Bolivia plans to invest billions towards expanding its electric grid through 2025. This energy plan would bring electricity to more rural areas and generate more electricity to meet domestic demand and increase export capacity.

What percentage of electricity is distributed in Bolivia?

The nationalized electricity distribution companies account for 51 percent of the distribution market. These companies fall under ENDE (the National Electricity Company). Bolivia's electricity production is based on thermoelectricity (71 percent), hydroelectricity (20 percent), and solar and wind (9 percent).

Which companies make electricity in Bolivia?

These companies fall under ENDE (the National Electricity Company). Bolivia's electricity production is based on thermoelectricity (71 percent), hydroelectricity (20 percent), and solar and wind (9 percent). The best sales prospects are with hydrocarbons: natural gas-related machinery, equipment, and production.

Will the decline of Bolivia's natural gas reserves lead to investment

opportunities?

The decline of Bolivia's proven natural gas reserves may present several investment opportunities for foreign firms since the government needs to demonstrate that it can fulfill current export contracts and meet increasing domestic demand.

Why did Bolivia become a net importer of fuel in 2022?

After 30 years of being a hydrocarbon exporting country, Bolivia became a net importer of fuel as of April 2022. Higher fuel prices and a decade of reduced exploration and production of natural gas are factors to this deficit. Future opportunities may be found in the areas of exploration, drilling, and natural gas production.
