

Kongres Container

Botswana container power generation price

Overview

Where does Botswana's electricity come from?

Prior to this period, most of Botswana's electricity was imported from South Africa's power utility, Eskom. In 2008 South Africa's electricity demand started to exceed its supply, resulting in the South African government restricting power exports.

How does the electricity section work in Botswana?

The section combines the local generation and imported electricity to come up with electricity that is available for distribution in Botswana. This does not take into account electricity used for auxiliary services, pumping, network losses as well as the production of electricity through incineration of waste.

How do I contact Statistics Botswana?

For more information, contact the Directorate of Stakeholder Relations at 3671300. All Statistics Botswana outputs/publications are available on the website at and also at Statistics Botswana Information Resource Centre (Head-Office, Gaborone).

What is the production capacity of Morupule Power a plant?

The Morupule Power A plant of capacity 132 MWH was augmented with the construction of Morupule Power B plant having production capacity of 600 MWH (BPC Annual Report, 2010). The Index of Electricity Generation is a Laspeyres index. The weighted average for electricity generation equals one because there are no various electricity products.
