Brazil s largest battery energy storage

Overview

ISO CTEEP claimed it as the first large-scale battery energy storage system (BESS) on Brazil's transmission grid. The project required a total US\$27 million investment. The transmission operator is permitted by regulations to earn up to US\$5 million revenues from the asset each year.

Energy storage in Brazil is entering a period of accelerated growth. Despite the absence of a legal framework, companies are expanding battery production, diversifying models, and preparing storage to play a central role in the energy transition. From ESS News Solar deployment has been a success.

Brazil Battery Energy Storage Systems Market is witnessing rapid expansion driven by growing renewable energy penetration, grid modernization, and supportive regulatory frameworks for clean energy adoption. The rise in intermittent solar and wind power generation is fueling demand for grid-scale.

Brazil cemented its position as Latin America's solar leader, ranking as the world's fourth-largest solar market in 2024 with 18.9 GW of new installations. While 2025 growth is projected to be modest (19.2 GW), the long-term outlook remains robust, with conservative estimates pointing to 90 GW and.
