# Cameroon Industrial and Commercial Energy Storage Power Station Connected to the Grid

## Overview

---

Why is the Cameroon power system a problem?

Another issue of the Cameroon power system is the absence of energy efficiency or demand side measures, which guarantees a safe, reliable and affordable option to reducing emissions and demand according to International Renewable Energy Agency (IRENA) .

Which power station in Cameroon has the largest electricity generation capacity?

Song-Loulou is the power station with the largest installed electricity generation capacity in Cameroon, boasting 384 MW since 1981. Situated upstream of Edéa, it connects to the southern interconnected grid (RIS).

How much power does Cameroon's energy sector development project Save?

This projected 5.9 GW capacity savings is more than the total anticipated hydropower capacity in the Energy Sector Development Project (PDSEN) of the Cameroon's Ministry of Energy and Water Resources .

What is the Cameroon power generation model?

The Cameroon LEAP model The bottom-up modelling methodology was used to developed the Cameroon power generation model in LEAP. The base year choice of 2016 was chosen due to the availability of reliable data, and commencement of most energy sector plans.

Who owns electricity in Cameroon?

The distribution network, consisting of over 22608 km distribution lines is operated by the utility company Energy of Cameroon (ENEO) . The nation of 26.55 million people has an electricity access rate of 70% in 2020. Rural and urban electrification rates were 32% and 98% respectfully [23, 24].

What is the current energy production in Cameroon?

Scientific articles and investigative reports on energy production in Cameroon have enabled an assessment of the current electrical energy production. The 2035 production estimate is based on the Energy Sector Development Projects (PDSEN) report in Cameroon. The current production is estimated at around 1600 MW. Considering the ongoing
