# Canadian solar energy storage power generation project

## Overview

---

What is Canadian Solar E-storage?

Canadian Solar's e-Storage has secured a contract from Nova Scotia Power to develop the first grid-scale battery energy storage projects across three locations in Nova Scotia, Canada.

What types of energy storage are available in Canada?

There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role in the electricity system by improving grid reliability and power quality, and by complementing variable renewable energy sources (VRES) like wind and solar.

How many solar energy projects are there in Canada?

Canada has 217 major solar energy projects producing power across the country. Canada has 341 wind energy projects producing power across the country. Canada ranks 24th in the world for installed solar energy capacity. Canada ranks 9th in the world for installed wind energy capacity.

Where is the largest battery energy storage system in Canada?

The Hagersville Battery Energy Storage park, located in Haldimand County, Ontario, Canada, will be the largest battery energy storage system (BESS) project to date in Canada. The project is expected operational in Q4 of 2025.

How much solar power does Canada have?

Canada's total wind, solar and storage installed capacity grew 46% in the past 5 years (2019-2024), including nearly 5 GW of new wind, 2 GW of new utility-scale solar, 600 MW of new on-site solar, and 200 MW of new energy storage.

When did energy storage start in Canada?

The first energy storage project in Canada, the Sir Adam Beck Pump

Generating Station, came online in 1957. However, the next project did not come online until 2013. There are three main types of energy storage currently commercially available in Canada:
