Chad Energy Storage Equipment Retrofit Plan

Overview

Does Chad framework allow private investment in energy production?

Chad framework has allowed private investment in energy production since only in recent years and as of 2018 Currently only one solar IPP (Djermaya - 28MW) is active and expected to reduce power supply failures and global price fluctuation. This project is also part of the Desert To Power Initiative.

What energy resources does Chad have?

The majority of its existing capacity comes from diesel, natural gas and heavy fuel oil generation. Chad is living an energy crisis that undermines its development possibilities with extremely limited electricity access (8%). The country is however rich of energy resources, including fossil fuels with strongest solar and wind energy potential.

Why is Chad a good place to invest in solar power?

Chad's location in the Sahel, which features brilliant sunshine especially during the dry season, and lack of alternate fuel sources such as coal make solar power an attractive export and investment sector. Chad currently generates electricity by consuming oil.

How does Chad generate electricity?

Chad currently generates electricity by consuming oil. With the declining cost of new solar generation plants, the Government of Chad and development partners have prioritized solar power throughout the country. Machinery and parts for electricity transmission and distribution are also in demand. Opportunities.

Why is electrification important in Chad?

The Government of Chad and development partners like the World Bank are prioritizing electrification to promote economic growth and inclusion. Per capita electricity consumption is one of lowest in the world and tariffs are

among the highest.

How many independent power producers in Chad?

There is One (1) active Independent Power Producers (IPPs) in Chad. Law No.036/PR/2019 relating to the national electricity law. Please read the law [here](#)
