Columbia Communications Green Base Station

Overview

Are green cellular base stations sustainable?

This study presents an overview of sustainable and green cellular base stations (BSs), which account for most of the energy consumed in cellular networks. We review the architecture of the BS and the power consumption model, and then summarize the trends in green cellular network research over the past decade.

What is a green base station solution?

The green base station solution involves base station system architecture, base station form, power saving technologies, and application of green technologies. Using SDR-based architecture and distributed base stations is a different approach to traditional multiband multimode network construction.

What is green radio communication networks?

Green Radio Communication Networks is an excellent snapshot of the state of green in wireless networking, and it is a nice overview of who is doing what and where in the field." 1. Fundamental trade-offs on the design of green radio networks Yan Chen, Shunqing Zhang and Shugong Xu 2.

What should a base station do in a wireless communications network?

In a wireless communications network, the base station should maintain high-quality coverage. It should also have the potential for upgrade or evolution. As network traffic increases, power consumption increases proportionally to the number of base stations. However, reducing the number of base stations may degrade network quality.

What is the mobile VCE Green Radio Project?

The Mobile VCE Green Radio project aims at developing new green radio architectures and radio techniques to reduce the overall energy consumption.

What are the best wireless access techniques for Green Radio Networks?

Wireless Access Techniques for Green Radio Networks: 12. Cross-layer design of adaptive packet scheduling for green radio networks Ashok Karmokar, Alagan Anpalagan and Ekram Hossain 13. Energy-efficient relaying for cooperative cellular wireless networks Yifei Wei, Mei Song and F. Richard Yu 14.
