Communication 5G base station Huawei

Overview

How many 5G base stations does Huawei have?

The contracts have been split into two projects, with the first covering 63,800 base stations using 2.6GHz to 4.9GHz spectrum, while the second covers 23,141 in the 700MHz band. Huawei is estimated to have secured 45,426 5G base stations worth an estimated 4.1 billion yuan (US\$574 million).

What is a Huawei base station?

Let's dive into a technical explanation. A base station, also known as an eNodeB (for 4G LTE) or gNodeB (for 5G NR) in Huawei's terminology, is a piece of equipment that facilitates wireless communication between user equipment (UE) like smartphones, tablets, and IoT devices, and the core network of the telecommunications provider.

Who won a 5G contract in China?

Huawei wasn't the only Chinese vendor to win a sizeable chunk of the tender, with ZTE the second-largest winner with around 26 percent of the contract, equivalent to 23,227 5G base stations. Smaller contracts were also awarded to Datang Mobile Communications Equipment, Ericsson, and Nokia Shanghai Bell.

How much will Huawei spend on 5G?

The operator, which ended Q1 with 983 million mobile subscribers, expects to spend 83.1 billion yuan (\$11.6 billion) on 5G networks this year. Huawei previously won 57 percent of China Mobile's previous 5G tender process back in 2020.

Which companies have been awarded a 5G contract?

Smaller contracts were also awarded to Datang Mobile Communications Equipment, Ericsson, and Nokia Shanghai Bell. China Mobile plans to operate more than 1.6 million 5G base stations this year, increase its number of cloud

servers by more than 240,000 units, and add 40,000 external data center racks.

What systems does Huawei offer?

Huawei provides comprehensive management and control systems, such as Huawei's U2000 or Huawei's Cloud BTS. These systems enable operators to monitor, configure, and manage base stations remotely, ensuring optimal network performance and reliability.
