Communication base station inverter transformer lightning protection price

Overview

What is a tower and antenna lightning protection system (LPS)?

Whether you use TV/radio equipment to send/receive communications, or just enjoy radio, a comprehensive tower and antenna lightning protection system (LPS) provides you with invaluable benefits. All TV/radio antenna lightning protection systems should be properly grounded to limit damage from lightning and electrical storms.

What is a hybrid lightning protection package?

A hybrid lightning protection package that offers a robust and cost-effective solution for communication towers. Provides a total Lightning Protection System (LPS) which includes direct strike protection, surge protection and grounding. Why is this solution more efficient?

.

What is a total lightning protection system (LPS)?

Provides a total Lightning Protection System (LPS) which includes direct strike protection, surge protection and grounding. Why is this solution more efficient?

Reduces the risk of a direct strike by lowering the electric field to below lightning-collection levels within the protected area.

Do antenna lightning protection systems need to be grounded?

All TV/radio antenna lightning protection systems should be properly grounded to limit damage from lightning and electrical storms. Our grounding and surge protection designs ensure your communications equipment is well-protected across all weather events. It is never too early to invest in tower and antenna lightning protection.

Do mobile communication components need protection against lightning and

overvoltage damage?

Mobile communication components, with their sensitivity and costliness in terms of procurement and upkeep, demand robust protection against lightning and overvoltage damage. A meticulously designed protection strategy is thus essential and advantageous in this context.

What is LEC lightning protection?

With this in mind, LEC has created a solution which makes it easy to implement a complete lightning protection system specifically designed with a tower's safety and operations in mind. A hybrid lightning protection package that offers a robust and cost-effective solution for communication towers.
