# Construction cost of lithium battery energy storage equipment

## Overview

---

68% of battery project costs range between £400k/MW and £700k/MW. When exclusively considering two-hour sites the median of battery project costs are £650k/MW. Get full access to Modo Energy ResearchHow much does a commercial battery energy storage system cost?

Average Installed Cost per kWh in 2025 In today's market, the installed cost of a commercial lithium battery energy storage system — including the battery pack, Battery Management System (BMS), Power Conversion System (PCS), and installation — typically ranges from: \$280 to \$580 per kWh for small to medium-sized commercial projects.

Are battery electricity storage systems a good investment?

This study shows that battery electricity storage systems offer enormous deployment and cost-reduction potential. By 2030, total installed costs could fall between 50% and 60% (and battery cell costs by even more), driven by optimisation of manufacturing facilities, combined with better combinations and reduced use of materials.

How much does a battery energy storage project cost?

Developer premiums and development expenses - depending on the project's attractiveness, these can range from £50k/MW to £100k/MW. Financing and transaction costs - at current interest rates, these can be around 20% of total project costs. 1) Total battery energy storage project costsaverage £580k/MW.

Are O&M costs lower for lithium-ion systems?

O&M costs are typically lower for lithium-ion systems due to fewer moving parts, but they should still be factored into your long-term budget. Modern BESS solutions often include sophisticated software that helps manage energy storage, optimize usage, and extend battery life.

Should you invest in a commercial battery energy storage system in 2025?

In 2025, investing in a high-quality ESS is not only affordable but essential for energy-forward businesses. Contact GSL Energy today to find the right storage solution for your business. Discover the true cost of commercial battery energy storage systems (ESS) in 2025.

How much does a gas storage system cost?

Generally speaking, the cost of the gas storage tank is the most expensive part of the entire system. Operation and maintenance costs include energy consumption and equipment maintenance. The current cost of compressed air energy storage systems is between US\$500-1,000/kWh.
