- The Reventazón, Pirrís and Cachí hydroelectric plants, as well as the Las Pailas I geothermal plant and the Valle Central Wind Power Plant benefit more than one million Costa Ricans. San José, February 14, 2025.- Electricity generation projects using water, wind, and heat from the earth that were.

Costa Rica has emerged as a world leader in renewable energy, creating a successful model that other countries aim to follow. With rich natural resources, including rivers, volcanoes, and sunshine, Costa Rica has effectively harnessed these elements to power its homes and businesses

sustainably.

Costa Rica stands out on the global stage for its unwavering commitment to renewable energy, maintaining an astonishing 99% clean energy generation rate as of 2024. Hydroelectricity forms the backbone of this achievement, making up about 75% of the nation's energy mix according to the Costa Rican.
