# Croatia s first hybrid energy storage system

## Overview

---

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Šibenik, marking a significant step in modernising the country's energy infrastructure.

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Šibenik, marking a significant step in modernising the country's energy infrastructure.

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to €16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a greenfield battery energy storage system (BESS) and virtual power plant (VPP) in Šibenik, Croatia.

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Šibenik, marking a significant step in modernising the country's energy infrastructure. The €60 million investment, co-financed by the European Bank for Reconstruction and Development.

Croatia is taking a major leap forward in its green energy transition, backed by a significant investment from the European Bank for Reconstruction and Development (EBRD) and other key partners. The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS).

Croatia's IE-Energy Projekt aims to develop a 60 MW battery energy storage system and virtual power plant in Šibenik. The European Bank for Reconstruction and Development (EBRD) is investing up to €16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a battery.

The Croatian government has allocated almost €20 million (\$23.2 million) of European Union Modernization Fund grants to help complete a 60 MW/120 MWh battery energy storage system (BESS) at an aluminum rolling mill site days after plans were revealed for a utility-scale battery storage system in.

Renewable Energy Sources of Croatia (OIEH) and the European Bank for

Reconstruction and Development (EBRD) have launched the development of an expert study titled "Identifying Grid Congestion Locations and the Need for Battery Energy Storage Systems in the Republic of Croatia". The goal of the.
