Desert solar Project Energy Storage

Overview

The 375 MWdc/300 MWac solar project, paired with a 150 MWac/4-hour battery energy storage system (BESS), is now delivering clean electricity to Clean Power Alliance (CPA) under a 20-year power purchase agreement (PPA).

The 375 MWdc/300 MWac solar project, paired with a 150 MWac/4-hour battery energy storage system (BESS), is now delivering clean electricity to Clean Power Alliance (CPA) under a 20-year power purchase agreement (PPA).

View our projects across North America. The 300 MW solar + 150 MW storage Desert Quartzite Solar+Storage Project, located in California, became operational in 2024. EDF Renewables handled the development of the project.

EDF Renewables North America and Power Sustainable Energy Infrastructure Inc. (PSEI) have officially announced the commercial operation of the Desert Quartzite Solar+Storage Project, a major milestone in California's transition toward sustainable energy. The 375 MWdc/300 MWac solar project, paired.

And as it happens, the Mojave is the location of a large new solar power plant integrated with battery storage. The Edwards Sanborn Solar and Energy Storage project incorporates the highest capacity solar farm in the United States with the largest battery storage system in the world. The facility.
