Direct-mounted energy storage power station

Overview

What is Zhiguang electric's new energy storage system?

In 2022, the company's new energy storage product was officially launched (20MW/40MWh). This is the world's largest single-unit cascade 35kV high-voltage direct-mounted large-capacity energy storage system. In 2022, Zhiguang Electric's 12GWh energy storage production line (Phase I) officially started construction.

Why should power grid enterprises use multi-point centralized energy storage stations?

For power grid enterprises, multi-point centralized medium and large-scale energy storage stations will be conducive to the reinforcement of the distribution network and the sustainable consumption of renewable energy.

What time does the energy storage power station operate?

During the three time periods of 03:00–08:00, 15:00–17:00, and 21:00–24:00, the loads are supplied by the renewable energy, and the excess renewable energy is stored in the FESPS or/and transferred to the other buses. Table 1. Energy storage power station.

Which energy storage plant will start construction in 2023?

In 2023, the company's 12GWh energy storage production line (Phase II) will officially start construction. In 2023, the company signed the first 100MW cascade high-voltage energy storage power station contract in China with Shandong Electric Power (China Huadian Group Laicheng Power Plant Energy Storage Project).

What are the limitations of a distributed power generation system?

In addition, the operation of equipment for distributed power generation is limited by the energy consumption, external environment, and other constraints, resulting in an idle or redundant energy supply capacity.

When does the energy storage system choose not to discharge?

When the grid price is in the valley period, such as 15:00–18:00, the energy storage system chooses not to discharge regardless of the power shortage. Thereafter, the energy storage system initiates the discharging mechanism when the grid price is in the peak period starting period of 18:00.
