

Kongres Container

Distributed energy storage product service provider

Overview

What is distributed energy storage?

The company's distributed energy storage solutions combine massive arrays of industrial-strength lithium-ion batteries with specialized software and control systems to enable flexible energy optimization.

What is distributed energy infrastructure?

Distributed Energy Infrastructure provides EPC services to customers intent on owning and operating renewable energy generation and battery energy storage assets in the United States. Our accomplished team brings a distinctive perspective to system layout, equipment selection, and optimization.

What is ABB distributed energy storage?

ABB provides a Distributed Energy Storage (DES) system, a packaged solution for storing energy for later consumption. The two essential components of the system are the DC-charged batteries and the bi-directional inverter. This equipment is enclosed in a shipping-friendly shell that can tolerate harsh conditions.

What are long-term energy storage systems?

Long-term energy storage systems, such as electrical or hydrogen storage systems, are used to store energy. Siemens' energy management solutions ensure that power generation, consumption, and storage are controlled in a dependable, optimal, and efficient manner.

Does SDG offer power purchase agreements & lease financing?

We offer Power Purchase Agreements (PPA) and Lease financing for commercial and industrial properties. SDG finances, installs, and maintains distributed energy systems including solar, battery storage, and virtual power plant (VPP) services to reduce operating costs and increase long-term energy

savings.

What is sunrock distributed generation (SDG)?

Sunrock Distributed Generation (SDG) is a leading national platform for developing, operating and financing commercial solar power systems, battery storage, and grid optimization solutions serving businesses, educational institutions, municipalities, and nonprofits across the USA.
