# Distributed power generation of integrated signal tower base station in Côte d'Ivoire

## Overview

---

What's new at Azito power plant in Côte d'Ivoire?

A 253MW combined-cycle unit is being added to the existing Azito power plant site near Abidjan, Côte d'Ivoire, as part of the plant's fourth phase expansion. Launched in March 2020, the \$370m expansion project will increase the plant's capacity to 706MW, accounting for 30% of the West African country's installed capacity.

Who built the Azito thermal power plant in Côte d'Ivoire?

The 453MW plant was developed in three phases, under a build-own-operate-transfer (BOOT) scheme. The Côte d'Ivoire Government contracted the construction of the Azito thermal power plant in 1998 to Azito Energie, a consortium comprised of IPS-WA, ABB, and Electricité de France (EDF).

Does Cote d'Ivoire have electricity?

Most of Cote d'Ivoire's primary energy demand is covered by local oil refinery supplies and domestic gas production. Almost 60% of the population had access to electricity in the country in 2017, a 10-percentage point's increase from 2015.
