Distributed solar panel projects

Overview

What is a community solar project?

The Project is operating as a community solar project. Community solar is a solar photovoltaic system interconnected directly to the local electricity grid via distribution lines. Once the system is placed into service by the utility and generating electricity, clean energy from the site feeds into the local power grid.

Why did solar power prices drop in 2024 compared to 2023?

The average power prices earned by solar projects in 2024 dropped by more than 50% compared to 2023, which has reduced the economic viability of new projects. Additionally, state policy uncertainty caused by proposed legislation last year has shaken developer confidence.

How much solar capacity did the residential segment install in Q2 2025?

In Q2 2025, the residential segment installed 1,064 MW dc of solar capacity, declining 9% year-over-year and 3% quarter-over-quarter. High interest rates, economic and policy uncertainty continue to be significant challenges for the segment.

How do I access large-scale solar projects in New York?

In addition, you can access large-scale solar projects that participate in New York's wholesale energy markets (projects larger than 5MW AC) as they are not included in this dataset. To get started, click on the map for county-specific data or hold Ctrl and click multiple counties. To see statewide data, click outside the map.

Why is the residential solar market struggling?

The residential solar market has struggled over the past few years, primarily due to sustained high interest rates. Consumer demand took a further hit in Q2 due to tariff and economic uncertainty, the whiplash of various OBBBA

drafts, and two more bankruptcies of major financiers.

Does AD/CVD increase solar module costs?

The AD/CVD case on solar cells and modules from Cambodia, Malaysia, Thailand and Vietnam, which began in April 2024 and was finalized on May 20th, 2025, increased module costs by 13% year-over-year across the distributed generation segments.
