Djibouti Communication Base Station Wind and Solar Complementary Guarantee Group

Overview

How can Djibouti achieve its energy goals?

Djibouti's substantial potential for geothermal electricity generation, along with its rising capacity to produce energy from wind and solar power plants, should help the country reach its goals in coming years. In addition to the growing need for generation capacity, the expansion of renewable energy is key for Djibouti to diversify its economy.

Who regulates geothermal energy in Djibouti?

The Ministry of Energy and Natural Resources formulates policies for the sector and regulates the electricity market. The Djibouti Office for Geothermal Energy Development (Office Djiboutien de Développement de l'Énergie Géothermique, ODDEG), directly overseen by the presidency, is charged with developing the country's geothermal energy potential.

What is the Djibouti office for geothermal energy development?

The Djibouti Office for Geothermal Energy Development (Office Djiboutien de Développement de l'Énergie Géothermique, ODDEG), directly overseen by the presidency, is charged with developing the country's geothermal energy potential. ODDEG was set up in 2013 to expand and operationalise the sector.

Will Djibouti be the first country to produce 100% green energy?

In its bid to become the first country on the continent to produce 100% green energy by 2035, Djibouti can also draw on other ambitious projects. These include the solar power project in the Grand Bara desert, for which work began in 2020.

Will Djibouti use wind power in 2022?

The UAE-based Amea Power signed an agreement with the Ministry of Energy and Natural Resources in July 2022 to build a 30-MW solar plant. The energy produced will be sold to EDD under a power purchase agreement. Djibouti is

also looking to exploit the untapped potential of wind power.

Will Djibouti be self-sufficient in energy production in 2035?

In December 2023, the Republic of Djibouti signed up to the African Green Hydrogen Alliance. The country's formidable prospects in terms of renewable energy means that Slim Feriani can look to the future with confidence. "The objective for 2035 is to be self-sufficient in energy production," he says. "We should get there before then."
