# Djibouti New Energy Storage Subsidy

## Overview

---

What is the source of Djibouti's energy?

Approximately 65 percent of Djibouti's electricity comes from external sources. The remaining energy comes from its own geothermal, solar, wind, and biomass sources. According to the International Renewable Energy Agency (IRENA), this reliance on imported energy can lead to price volatility that can hinder economic development plans.

What is the current state of electricity in Djibouti?

Electricity sector: Current state □Djibouti's electricity supply is based on : □Thermal generation (diesel and heavy fuel oil): 20-40%. □Hydroelectric imports from Ethiopia (since 2011): 60-80%. o The country's current energy production is 220 MW, broken down as follows □Public generation of 120 MW by EdD.
