EU bifacial solar panel manufacturers

Overview

Are bifacial solar panels available in the UK?

Currently, a handful of manufacturers offer bifacial solar panels in the UK. Below are the available models, all of which are monocrystalline. As time goes by, we're sure to see more manufacturers release their own bifacial solar panels.

What are bifacial solar panels?

Bifacial solar panels (modules) have solar cells on both sides of the unit, with glass on the front and a clear fluoropolymer sheet on the back, allowing them to produce up to 25% more energy than the typical monofacial solar panel widely used today. Bifacial modules can be used with standard racking and inverters for any type of solar array.

How many bifacial panel manufacturers are there?

There are 344 bifacial panel manufacturing companies listed below in the 'Bifacial -- Solar Panel Manufacturers - High Efficiency Crystalline' title.

Who is EU solar module manufacturing company?

The EU solar module manufacturing company that delivers novel products to solar market. Our development and flexible OEM manufacturing capabilities allow us to create one-of-a-kind design, custom-shaped and sized solar solutions for seamless integration for BIPV projects and IntegratedPV products worldwide.

Are bifacial solar panels the future of solar energy?

Bifacial solar panels, which can collect energy from both the front side and the rear side, are possibly moving more seriously into play now due to cost drops and efficiency improvements. A bifacial solar panel is a solar panel that can collect energy from both sides, while a normal monofacial panel can only collect energy from one side.

What is the EU solar manufacturing map?

The EU Solar Manufacturing map gives an overview of solar manufacturing companies active along the solar PV chain. On this map, you'll find manufacturers spanning from polysilicon to module as well as the aggregate production capacities for each segment.
