# El Salvador Solar Panel Power Generation Project

**5** Years warranty

## Overview

---

Where is El Salvador building its first solar energy plant?

Photo: CEL. San Salvador — The state-owned and autonomous Comisión Ejecutiva Hidroeléctrica del Río Lempa (CEL) of El Salvador will build its first solar energy plant in the country, in the municipality of Talnique, in La Libertad department in the country's southwest, around 30km (18.5 miles) west of the Salvadoran capital.

How many solar projects are there?

There are more than 8,100 major solar projects currently in the database, representing over 339 GWdc of capacity. There are over 1,250 major energy storage projects currently in the database, representing more than 97,000 MWh of capacity. The list shows that there are more than 178 GWdc of major solar projects currently operating.

What is the major solar projects list?

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for informational purposes only, reflecting projects and completed milestones in the public domain.

Where can I find a list of major solar project data?

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.
