Our growing battery energy storage team has executed more than 90 BESS projects in the United States. They draw experience from our battery subject matter professionals representing all disciplines including civil, structural, mechanical, electrical, fire protection, acoustics, and commissioning. We assist clients with new facilities, designs for u.

As more battery energy storage systems are developed and implemented, a wider array of custom battery enclosures and configurations are available to developers. One critical but often overlooked aspect of lithium-ion BESS facilities is thermal management. Most battery manufacturers have strict temperature requirements, including maximum, minimum, a.

Coffman is current with up-to-date regulations, codes and standards, to help clients navigate required code updates. The California Fire Code (CFC) 2019 Edition updated Section 1206, which affects building occupancy classification, sprinkler systems, fire suppression, deflagration, and thermal runaway system requirements. Additionally, in July 2021.
