Energy Storage Island Power Station Construction Plan

Overview

What's going on with Long Island's Battery energy storage projects?

The Long Island Power Authority approved two utility-scale battery energy storage contracts on Wednesday, Dec. 18 — a 50-megawatt project on LIPA's property that had formerly been slated to become the Shoreham Nuclear Power Plant, and a 79-megawatt facility on Rabro Drive in Hauppauge.

Which long Island utility-scale battery energy storage projects have been approved?

The Long Island Power Authority approved two utility-scale battery energy storage contracts on Wednesday, Dec. 18 — a 50-megawatt project on LIPA's property that had formerly been slated to become the Shoreham Nuclear Power Plant, and a 79-megawatt facility on Rabro Drive in Hauppauge.

Do Island power systems have centrally managed storage facilities?

Centrally managed storage facilities in island power systems dominate the relevant literature. Table 4 includes the papers dealing with the centrally managed storage concept. Table S2 of the Supplementary data and Fig. 7 present additional details for the most representative ones.

How important are energy storage stations in Nii?

Undoubtedly, energy storage stations (ESS) are vital for the electricity sector of NII to move to penetrations of renewables over 50 %. As can be inferred from Table 1, pumped hydro storage (PHS) and battery energy storage (BES) technologies dominate the landscape of actual grid-scale applications for island systems.

Why did Lipa approve a battery energy storage system?

“CCE applauds LIPA for approving the contracts for two Battery Energy Storage Systems, which will assist our critical transition away from dirty, polluting peaking plants while creating a more resilient energy grid and

delivering renewable power to Long Island homes.

Can energy island construction be completed without a permit?

Without an exemption, energy island construction could not proceed until a construction permit is issued. As stated in the supplement: “Substantial schedule delays for the Natrium Demonstration Project, as supported by a public-private partnership with the Department of Energy (DOE) Advanced Reactor Demonstration Program (ARDP), would be incurred.
