Togo is taking a significant leap forward in its energy transition by launching a 55 MW pilot project for battery storage. This ambitious initiative, backed by a €25 million loan from the French Development Agency (AFD) and the Global Energy Alliance for People and Planet (GEAPP), is set to.

Construction of a utility-scale solar-plus-storage project is now underway in northern Togo. The 25 MW Dapong solar project will include 36,000 solar panels across 52 hectares, along with 36 MWh of battery energy storage. It is expected to serve about 145,000 people in the city of Dapaong. China's.

A solar PV plant with a battery energy storage system in Togo is set to expand its capacity to provide electricity to thousands more households. At present, the Sheikh Mohamed Bin Zayed Solar PV Plant has 70MW and 4MWh installed capacity. Renewable energy project developer AMEA Power confirmed that.

Washington, October 17, 2025 — Agence Française de Développement (AFD) and the Global Energy Alliance for People and Planet have signed a USD 200,000 contribution agreement. This agreement will finance feasibility studies for a battery energy storage system (BESS) project in Togo - a crucial step.

Togo is launching a pilot battery energy storage project to stabilize its national grid and accelerate the country's shift toward renewable energy. The initiative is being supported by the French Development Agency (AFD) and the Global Energy Alliance for People and Planet (GEAPP), which have.
