# Ethiopia Telecommunication Base Station Inverter Grid Connection Site Planning

## Overview

---

Does Ethiopia have an off-grid target?

governments are trying to emulate. In 2017, Ethiopia launched its first NEP, resulting in an improvement to 33% in on-grid and 11% in off-grid access to electricity by the end of 2019. Recognising the need to strengthen off-grid planning, an updated version of the NEP (NEP 2.0) was developed in 2019, including a target.

What is Ethiopia's Electrification Program (NEP)?

The Electrification Program (NEP). The plan designates the most suitable access technology per community throughout the country – an approach many governments are trying to emulate. In 2017, Ethiopia launched its first NEP, resulting in an improvement to 33% in on-grid and 11% in off-grid access to

How is EEU delivering mini-grids in commercially attractive areas?

Several models have been developed: The Ethiopia Electric Utility Company (EEU) is driving delivery of mini-grids in commercially attractive areas, typically through tendering out Engineering, Procurement & Construction (EPC) and short-term operations and maintenance (O&M) of three to six months to private sector entities, after which
