European solar energy storage system battery

Overview

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

What is the battery storage Europe platform?

The Battery Storage Europe Platform brings together industry leaders representing the battery storage value chain to advance the business case and regulatory frameworks for battery storage across the EU. Together, we urge a tenfold increase in battery storage by 2030 to ensure Europe's energy transition, security, and competitiveness.

Is battery storage a political priority in Europe?

We're accelerating battery storage across Europe by making it a political priority: 10X by 2030! In 2024, Europe installed 21.9 GWh of new battery storage capacity: 11th consecutive record breaking year of annual additions
Annual growth slows down in 2024 to 15%: inflection point toward next strong growth phase, led by grid-scale deployment.

Did Europe have a record-breaking year for battery storage installations?

A new analysis from the latest European Market Outlook for Battery Storage shows that Europe experienced another record-breaking year for battery storage installations, even though the year-on-year growth rate has slowed.

Is the battery storage age just beginning in Europe?

Walburga Hemetsberger, CEO of SolarPower Europe (she/her), said: "If Europe has already entered the solar age, the battery storage age is just beginning. With solar energy mainstreaming across the continent, now is the time for

European decisionmakers to put batteries at the centre of a flexible, electrified, energy system.

How big is the battery storage capacity in Europe?

the operating battery storage capacity reached 49.1 GWh at the end of 2024. Over the past 4 years, the enlargement of Europe's BESS fleet has intensified, achieving a CAGR of nearly 0%, whereas from 2018-2021, the average annual increase remained below 50%. Thanks to this upswing during the last 4 years, the battery storage capacity in Europe is
