Overview

Can a factory use rooftop solar?

A standard solar system for factories can range from 100 kW to several megawatts, depending on the site's connected load and power usage patterns. Key areas where rooftop solar for manufacturing units prove effective include running energy-intensive machines like chillers, air compressors, furnaces, extrusion lines, and injection molding systems.

What is an industrial rooftop solar system?

An industrial rooftop solar system is specifically designed to meet the high energy demands of factories, warehouses, and large-scale production units. Unlike residential systems, rooftop solar for manufacturing units involves higher capacity, more complex wiring, and specialized components to support industrial-grade equipment.

How many kW can a rooftop inverter run?

50kW for 208V grids; 80kW, 100kW, 110kW, 120kW for 480V grids. Our rooftop inverters are ideal for driving more energy and more safety into a broad range of large-scale commercial projects. Available for 208V and 480V grids. 10kW, 17.3kW for 208V grid; 30kW, 40kW for 480V grid.

How do solar panels work on a factory roof?

Solar panels on the factory roof capture sunlight. Through the photovoltaic effect, solar cells convert light into direct current (DC) electricity. This raw DC power is collected and channeled via cables into the inverter system. The energy output depends on the sunlight intensity and panel efficiency.

What is rooftop solar for manufacturing units?

Unlike residential systems, rooftop solar for manufacturing units involves higher capacity, more complex wiring, and specialized components to support industrial-grade equipment. These systems are typically installed on the

rooftops of production plants, fabrication units, or CNC machining workshops.

What are the advantages of rooftop solar for factories?

The advantages of Rooftop Solar for factories go far beyond just cost savings. From gaining energy independence to enhancing brand value and contributing to a cleaner planet, solar energy is a smart investment for forward-looking industrial leaders.
