Flexible solar panels (bendable solar panel) are solar modules made using thin-film photovoltaic (PV) materials or specially designed crystalline silicon that allow the panel to bend and flex without breaking. Unlike the rigid solar panels that are mounted on rooftops and weigh significantly more.

NREL analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. NREL's PV cost benchmarking work uses a bottom-up.
