France Light Solar System Price

Overview

France releases new FIT rates for PV systems up to 500 kW France's new feed-in tariffs (FITs) for February to June 2025 range from €0.0839 (\$0.0907)/kWh to €0.1295/kWh, depending on system size. Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

Why are French PV system owners using more solar power?

Lower payments for PV energy fed into the grid are pushing PV system owners in France to use more of their own solar power. The solar energy market in France is changing quickly. In 2024, the French government introduced significant cuts to feed-in tariffs (FITs) - the rates paid to PV system owners for feeding surplus electricity into the grid.

How much does a PV system cost in France?

The trend has only intensified in 2025. As of early 2025, PV systems with a capacity of up to 9 kW now receive a feed-in tariff (FIT) of just €0.04/kWh. In stark contrast, the current retail electricity price in France stands at €0.2146/kWh - more than twice the current FIT.

How much does it cost to install solar panels in France?

A French law passed in 2023 will require parking lots larger than 50,000 square feet (4,600 m²) to build solar canopies covering half their area. This could result in installed capacity of 6.75-11.25 gigawatts, at a cost of \$8.7-14.6 billion.

How big is residential solar PV in France?

The average size of residential solar PV systems is estimated to be 3.24 kW

moving to 2030. The technical potential for residential solar PV in France is estimated at 34,810 MW. The payback time for residential Solar PV in France is 25.1 years as of 2015.

How much does electricity cost in France?

In stark contrast, the current retail electricity price in France stands at €0.2146/kWh - more than twice the current FIT. It is worth noting that the previous FIT was as high as €0.127/kWh, marking a significant decrease in feed-in compensation. However, it's not only the lower payments that concern owners of residential PV systems.
