Greek Energy Storage Base Project

Overview

Greece's grid-scale battery rollout accelerates with new 49 MW / 98 MWh unit in Chalkidiki. Greek renewable energy company Principia has completed the construction of its first battery energy storage system (BESS), known as Themelio.

Greece's grid-scale battery rollout accelerates with new 49 MW / 98 MWh unit in Chalkidiki. Greek renewable energy company Principia has completed the construction of its first battery energy storage system (BESS), known as Themelio.

A draft ministerial decision envisages the installation of 3.55 GW of standalone battery energy storage systems which will be granted priority connection to the transmission or distribution grid and operated on a merchant basis without subsidy support. From ESS News The Greek Ministry of Energy and.

Greece's grid-scale battery rollout accelerates with new 49 MW / 98 MWh unit in Chalkidiki. Greek renewable energy company Principia has completed the construction of its first battery energy storage system (BESS), known as Themelio. Located in the Vouno area of Chalkidiki, near Polygyros, the 49.

On 13 March 2025, the Greek government issued Ministerial Decision ΥΠΕΝ/ΓΔΕ/28255/1143 (Government Gazette 1248/B/13.03.2025) on the priority regime for the final grid connection of standalone BESS projects. The decision describes the conditions a BESS owner has to meet to submit a "priority".

The much-awaited ministerial decree for zero-subsidy standalone battery systems has been published in Greece. So far, Greece has provided support to 900 MW of standalone storage projects under three previous auctions. The new plan, prepared by the Ministry of the Environment and Energy, calls for.

ELSEWEDY ELECTRIC has officially closed financing for Greece's first standalone 50MW/100MWh Battery Energy Storage System (BESS), a key milestone in the country's push toward renewable energy. Scheduled for completion by Q4 2025, the project will play a crucial role in enhancing the

stability of.

The role of Battery Energy Storage Systems (BESS) in stabilizing grids and facilitating the integration of renewable sources has never been more critical. In recent weeks, only months after Greece revised upward its NECP target for storage, there has been a strong policy momentum both in Greece and.
