How many new energy stations are there in Algeria

Overview

Algeria has unveiled a plan to build seven new desalination plants between 2025 and 2030 in Tlemcen, Mostaganem, Tizi Ouzou (two stations), Chlef, Jijel and Skikda. How many MW does Algeria's new power plant generate?

Both plants, being developed by Algeria's state-owned Sonelgaz, will each generate 1,340 MW. Both projects are expected to start operations in 2025 and are expected to enhance Algeria's power generation infrastructure while supporting energy security and fuelling the country's economic growth.

Which power plants are being built in Algeria?

Combined Cycle Power Plants: Biskra and Bellara Algeria's electricity generation capacity is set to grow with the construction of two major combined cycle power plants: Biskra and Bellara. Both plants, being developed by Algeria's state-owned Sonelgaz, will each generate 1,340 MW.

What is the energy sector in Algeria?

The energy sector represents a major industrial activity and economic contributor in Algeria. The country is the leading primary energy producer in Africa, with an annual generation of close to seven quadrillion British thermal units.

What are Algeria's key energy projects in 2025?

Algeria is advancing several key energy projects in 2025, aimed at increasing natural gas production, expanding electricity generation and enhancing renewable energy capacity.

How many projects has powerchina done in Algeria?

They are significant milestones for the development of Algeria's new energy industry. Over these years, POWERCHINA has undertaken a total of 26 projects in Algeria, covering a wide range of areas including dams, irrigation, municipal infrastructure, civil engineering, grain storage, and new energy.

How much electricity does Algeria generate a year?

Algeria currently generates a relatively small amount of its electricity (e.g., three percent or 686 MW annually), from renewable sources, including solar (448 MW), hydro (228 MW), and wind (10 MW).
