How many watts of solar panels are there in the Netherlands

Overview

As of June 2024, the Netherlands had almost 11 gigawatts of residential solar PV capacity. Since 2020, the residential solar PV capacity installed in the country more than doubled. How many solar panels are installed in the Netherlands?

The installed capacity of solar panels varies between municipalities. In 2023, an average of 0.71 megawatts of solar panels per square kilometre was installed in the Netherlands. Total installed capacity in 4 out of 10 municipalities in the Netherlands was more than one megawatt (one million watts).

How much solar power does the Netherlands have?

The Netherlands has a total installed capacity of just under 24.4 gigawatts, equal to 1,386 watts per inhabitant, or 3.5 solar panels per person – a number that has never been recorded before. Being the front runner in solar power also means that the Dutch will be the first to run into capacity and grid congestion issues.

How many solar panels does a Dutch House need?

The number of solar panels needed for your home also depends on a few factors, including: The average home installation falls between 10 to 12 solar panels, which would partially power the average Dutch house with solar energy. Solar panels can cover your entire roof in the Netherlands, depending on your energy needs. Image: Freepik.

How big is Dutch solar power in 2023?

Production capacity rose 22% in 2023 when compared with 2022 and is almost 40 times higher than in 2013, the CBS said. Some 42% of capacity is on the roof of private or rental homes, with the rest in the hands of companies. In total, Dutch solar panel capacity has almost reached 24 gigawatts, or 24 billion watts, the CBS said.

How much power does a solar panel produce?

Power generated by solar panels has risen again, as it did in recent years. In 2023, solar panels produced nearly 20 thousand gigawatt hours. This is almost as much as the total electricity consumption of all the homes in the Netherlands and nearly 17 percent of the total net electricity production.

Are Dutch homes getting more solar panels in 2023?

Despite concerns about the cost, the Dutch continued to add more solar panels to their homes in 2023, according to new figures from national statistics agency CBS. Production capacity rose 22% in 2023 when compared with 2022 and is almost 40 times higher than in 2013, the CBS said.
