Is it worth spending a little extra to get both from the same manufacturer to get communication between inverter/battery?

Can equipment from different manufacturer communicate?

Any help would be appreciated. Thanks. Even a doofus can achieve high post counts. Is it worth spending a little extra to.

Power conversion and adaptation: The inverter converts DC power (such as batteries or solar panels) into AC power to adapt to the power needs of various communication equipment. This is critical to ensure stable operation of base station equipment regardless of power source type. Increased energy.
