Huawei Myanmar solar inverter

Overview

Why should you choose Huawei inverters?

Huawei inverters are celebrated for their smart capabilities and advanced monitoring features. Fortis Myanmar Technology integrates Huawei inverters to provide clients with intelligent and user-friendly solar energy solutions. Our commitment doesn't end with the sale.

What types of solar inverters are available at Fortis Myanmar Technology?

Explore our diverse range of solar inverters, including Off-Grid, On-Grid, and Hybrid options, featuring renowned brands like Growatt, Solaredge, and Huawei. At Fortis Myanmar Technology, safety is our top priority. Our engineers undergo rigorous training to ensure that each solar installation adheres to the highest safety standards.

Does Myanmar have solar power?

Well, Myanmar's installed solar capacity stood at 84 Megawatts at the end of 2020. With a solar power probable capacity of 51 Terawatt-hours annually, it has barely scratched the surface of its potential. However, things are looking up for Myanmar's solar prospects if recent developments are anything to go by.

Where can I buy solar equipment in Myanmar?

Several equipment manufacturers and suppliers serve Myanmar's solar market. It is also possible to import locally unavailable solar equipment from established markets like China and the USA. Myanmar boasts several ports that allow you to receive imported solar equipment from any part of the world.

What is a microinverter solar system?

Typically, microinverters are "distributed" inverters. Solar PV systems with microinverters have a small inverter installed for each individual solar panel.

Instead of sending energy from every panel to a single inverter, microinverters convert the DC energy to AC energy on the roof itself.

Where are solar inverters located?

Microinverters are located on the roof near the solar panels, due to which these inverters are more efficient than string inverters when it comes to converting energy. Solar systems with microinverters can still generate electricity, even if one or two panels do not perform properly.
