Israel outdoor communication battery cabinet automation equipment manufacturer

Overview

Who is Contel Automation & Control Ltd?

Contel Automation & Control Ltd. -specializes at industrial mechanization equipment supply and systems and , HVAC&R control, construction management systems and process control. Contel ICS -provides engineering and integration services whit the largest team of control and software engineers in Israel in a wide range of industries.

How many ABB analyzers are installed in Israel?

The systems, product of ABB, model URAS 26, includes 500 analyzers installed in Israel. The Analyzer enables automatic calibration with gas-filled calibration cells (which eliminates the need for calibration gas cylinders). It also provides QAL 3 data. The sampling systems are also made by ABB.

Who is Contel electromechanics?

Contel Electromechanics was chosen to be the main electrical contractor for the construction of the new power plant being built in Alon Tavor. As part of the project, we manufactured the prefabricated structures that will serve as electrical rooms, heads, rooms for MCC panels and control panels in the project.
