# Italian energy storage station electricity price

## Overview

---

Italy's Regulatory Authority for Energy, Networks and Environment (ARERA) has approved a series of modifications impacting the maximum price that can be offered in the country's first forward capacity market auction for electricity storage (MACSE).

Italy's Regulatory Authority for Energy, Networks and Environment (ARERA) has approved a series of modifications impacting the maximum price that can be offered in the country's first forward capacity market auction for electricity storage (MACSE).

However there are deeper structural dynamics in play making Italy attractive for BESS investors – including the country's rapid solar expansion, zonal price volatility, and grid flexibility needs. This article sets out current key trends shaping BESS value in Italy, from renewables rollout and.

Clean Horizon has released its latest Energy Storage Price Forecast for Italy, providing valuable insights into one of Europe's most dynamic emerging markets for battery storage. Italy is accelerating its energy transition with ambitious targets and a robust policy framework, aiming to deploy 71.5.

Customer-sited storage adoption has been mainly driven by a combination of high electricity prices and generous tax incentives. For utility-scale systems, Italy has established favourable electricity market rules that enable projects to earn revenues from a range of different sources. Battery.

Italy's electricity generation mix in 2025 is characterized by a growing share of renewables and a declining reliance on coal, with natural gas remaining the single largest source. Natural gas fuels a significant portion of Italy's power plants – roughly 35–40% of total generation in recent years.

This is 2% more than yesterday. The issue of electricity pricing in Italy, a subject of much discussion, finds itself at the forefront of public concern as the cost of energy generation and transmission continues its upward trajectory, leading to a substantial increase in the monthly electricity.

of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating costs for those developing, building and by the European Commission at the end of 2023. Italy will promote investments in utility.
