# Kazakhstan solar energy storage power generation project

## Overview

---

Is Kazakhstan a good place to invest in solar power?

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further integration of renewables into the grid.

How many solar power plants are there in Kazakhstan?

Solar Power: The potential of solar energy in Kazakhstan is estimated at 2.5 billion kWh per year. Solar energy can be widely used in two-thirds of Kazakhstan's territory. The government aimed to put 28 solar power plants into operation by the end of 2021, and met this goal, with currently 51 solar power plants in operation.

What was the installed solar power capacity in Kazakhstan in 2018?

As of 2018, the solar power generation was 0.1 TWh and the installed capacity was 209 MW. Solar power generation in renewables energy is expected to meet the highest electricity demand on Kazakhstan's power grid.

Where is Kazakhstan's new solar power plant located?

A few months later, the EBRD loaned another \$42.5 million toward a \$75 million 63 MW solar photovoltaic power plant that Risen is building in Chulakkurgan, north of Shymkent. China, which now produces 70 percent of the world's solar panels, is well represented in Kazakhstan's new renewable projects, but it is not the only player.

What is Kazakhstan's largest solar project?

Kazakhstan's largest solar project – a 100 MW field in Saran, Karaganda Province – was opened last year by a German company, also with EBRD backing. Russian engineers doubled capacity at the EBRD-backed Burnoye

plant in Zhambyl in 2018.

How big is solar capacity in Kazakhstan?

Back in 2015, Astana was predicting installed solar capacity by the end of 2020 to reach 714 MW. A government report last month said solar capacity had reached 467 MW. Indeed, renewables are still small fry in Kazakhstan. Today solar accounts for 56 percent of the country's total renewable capacity.
