Kazakhstan solar power supply system manufacturer

Overview

What is Kazakhstan's largest solar project?

Kazakhstan's largest solar project – a 100 MW field in Saran, Karaganda Province – was opened last year by a German company, also with EBRD backing. Russian engineers doubled capacity at the EBRD-backed Burnoye plant in Zhambyl in 2018.

Where is Kazakhstan's new solar power plant located?

A few months later, the EBRD loaned another \$42.5 million toward a \$75 million 63 MW solar photovoltaic power plant that Risen is building in Chulakkurgan, north of Shymkent. China, which now produces 70 percent of the world's solar panels, is well represented in Kazakhstan's new renewable projects, but it is not the only player.

How many solar power plants are there in Kazakhstan?

As of now, there are 51 solar power plants in operation in Kazakhstan. The government aimed to have 28 solar power plants operational by the end of 2021 and successfully met this goal. The potential of solar energy in Kazakhstan is estimated at 2.5 billion kWh per year.
