# Kosovo Outdoor Power Supply

## Overview

---

Kosovo Energy Distribution and Supply Company (KEDS) is a company operating throughout Kosovo having the exclusivity for electricity supply and distribution in the territory of Kosovo. Overview The electricity sector of relies on coal-fired power plants (92% as of 2023) and is considered one of the sectors with the greatest potential of development. The inherited issues after the war in Kosovo and the transitio.

The main institutions responsible for the energy sector management in Kosovo are: Ministry of Economic Development (MZHE) and (ERO). Important responsibilities are also held by the.

By 2021 Kosovo had 279 MW of Renewable Electricity Standard (RES) power generation capacity installed. The Kosovo energy strategy includes increasing RES capacity to 35% of electricity c.

Who is Kosovo Energy Distribution & Supply Company (KEDS)?

Kosovo Energy Distribution and Supply Company (KEDS) is a company operating throughout Kosovo having the exclusivity for electricity supply and distribution in the territory of Kosovo. Since May 2013, Kosovo Energy Distribution and Supply split from Kosovo Energy Cooperation and started its operational activities as a joint stock company.

Does Kosovo need a lignite power plant?

Kosovo, rich in lignite coal reserves, relies on outdated Yugoslav-era power plants that cannot meet its increasing energy demands. The 2023 National Energy Strategy aims to raise renewable energy to 35% of the energy mix, reduce greenhouse gas emissions by 32%, and phase out a lignite-fired power unit by 2031.

Does Kosovo need a power plant?

Kosovo has one of the world's largest lignite-coal reserves and it remains dependent on two depreciated and inefficient Yugoslav-era power plants which do not meet Kosovo's energy needs.

What is Kosovo's Energy use?

Kosovo's energy use is driven by households, primarily for wintertime heating. Kosovo's housing stock is largely inefficient and uninsulated.

How much power does Kosovo have?

Energy Infrastructure Today, Kosovo's electricity operating capacity is about 900 MW, almost all of which comes from two antiquated coal-fired power plants, Kosovo A and Kosovo B. As the population grows, ongoing constraints on power will continue to increase.

Why is electricity expensive in Kosovo?

Usually, in Kosovo the imported energy is much more expensive than export. This is because Kosovo imports energy one day before needed, in the other hand energy is exported during the night when the demands are under generating level. Imports and exports have a negative impact for electrical energy price.
